

Jaacob Bowden has one of the most unique & inspiring stories in the world of golf.

At 27 years old, Jaacob was an average golfer and a successful computer engineer working in the corporate world in the dot-com days. He seemingly had it all...and yet he felt called to do something else with his life. An afternoon in Atlanta at the PGA Championship changed his life, and soon after, he was cashing in his life savings to embark on a dream to become a professional golfer.

Twenty years later, Jaacob has built many successful, cutting-edge golf companies, played over 275 golf courses worldwide, become one of the world's top golf instructors and pioneers in golf performance, a long drive champion, a record setting speed golfer, and played in & made multiple cuts with tournament rounds in the 60s & 70s in many tour events worldwide, including qualifiers for the Open Championship, US Open, PGA Championship, DP World Tour, & PGA TOUR, amongst countless other achievements. Throughout his journey are incredible stories of perseverance, resilience, innovation, elite performance, drastic transformation, and courage to risk it all in pursuit of a life-changing dream - one that continues today.
